Ridgewood Addition Is Attracting More Attention Than Any Addition That Has Been On the Market for Some Time.

Owing to the close proximity to the downtown section and the lofty elevation overlooking the city, covered with native oak and elm trees, making it a real home addition, with binding building restrictions as to flat store buildings of any character, building line of 40 feet from property line, and restrictions from five thousand to ten thousand dollars; the water and sewer mains are being rushed to completion and then the paving follows. Paving will commence early in July. Many magnificent homes are being planned and a building boom of good homes will soon be a reality. If you are planning a good home in a high-class residence section this is your last opportunity to get inside property at such prices. You can get a much larger loan on inside property than you can edge property and it is the last to depreciate and the first to advance in price. We do not make terms the predominant feature as some addition owners do as that is about all they have to offer. Our terms are one-third cash, balance in six and twelve months with interest at 8 per cent. Some secured your home site do not delay another day as the number is growing less each week. For further particulars, see
